10 Panel Urine Drug Test (Not required for Dental Assisting)	Date:	Result:	
Copy of Personal Health Insurance			

N.J.A.C. 8: 39-19.5(b) mandates that “each new employee shall,” receive a two-step Mantoux tuberculin test with five units of purified protein derivative. The only exceptions shall be documented negative two-step Mantoux skin test results (zero to nine millimeters of induration) within a year, a documented positive Mantoux skin test (10mm or more of induration), those having received appropriate medical treatment for tuberculosis, if medically indicated.

*This mandate is interpreted to include those students who give direct care to those patients who are frail and elderly. Therefore, students must have a two-step Mantoux tuberculin skin test. If the first is negative then the second should be administered one to three weeks later; these will be documented on their physical form.

This test must be completed within one month prior to the start of the program.

Two Step Mantoux Tuberculin Skin Test #1 Date _____ Results _____
 #2 Date _____ Results _____
 Chest X-Ray (if indicated) Date _____ Results _____

* Mantoux Tuberculin Skin Test is required annually while in a program that is longer than 1 year.

4. The health physical must be completed within the last six months prior to the start of the class. If completed prior to 6 months a new physical will be required.
