### **EXHIBITIONS IN THE NEVIN WELCOME CENTER**

### **March-April**

# "Blooms from Being Planted 2018"

Photographic Images by Mary Kay Marks

Mary Kay Marks is an artist from Cortland, New York. Cornell Botanic Gardens plays an integral part in her artwork; this exhibit started as photographs taken in the garden. She writes, "Images have a way of connecting in your mind. When you see the smallest detail, it can ingrain itself into your brain and you can see it over and over in other places."

### **May-June**

# "Petal Portraits"

Colored pencil drawings by Jim Kozlowski

"After making a living for my family as a production potter for 36 years, I have returned to my first love, painting. One of my inspirations is the variety and beauty of the blooms at the Botanic Gardens and in our gardens here at our new home. I appreciate the time and freedom I have now to fully explore the colors and textures I see in nature's glorious creations. The wonders of Nature continue to surprise and delight me, and I share these feelings through my work."

--- Jim Kozlowski
