

HCESC Adult and Continuing Education

Planning an Addition to Your Home

This workshop will help you make the right choices and plan for a greener home! Come listen to a licensed architect provide a seminar on planning and constructing an addition to your home. This class will provide an overview of the steps required to construct a residential addition. It starts with the planning stages and ends with construction. Topics will include: establishing a budget, selecting an architect and builder, incorporating green strategies and others. Taught by DeBiasse and Seminara Architecture Planning.
